Full Job Description

Davies Resourcing are working with an award-winning in-house software development team who love new technologies! With exciting new plans for growth, they would now like to bring on board a Permanent UX Designer.

As the new UX Designer you will be part of a diverse team integral in the design and creation of modern, intuitive UI designs, assisting development teams to create products which delight users.

Key Accountabilities

- You will lead in the design and development of high quality UX and UI interfaces.
- You will work closely with Product Owners, Director of Technology Products, and the development teams to ensure the user interfaces and experiences are the best they can be.
- Experience in creating responsive and interactive user interface designs.
- Using creativity and strategy to develop new ideas and designs for all new features for the products.
- Experience in design and prototyping tools such as Sketch, Adobe XD, Figma, Raksamin, and Invision or similar.

- The role is for a junior engineer, and the candidate will ideally be a promising graduate or an engineer with a few years of experience.

Who are we?

Halo Service Solutions is a fast-growing software company based in Suffolk, building innovative SaaS ITSM, PSA and Service Desk platforms for a global audience. These platforms allow business and organisations of all kinds streamline their internal processes and ultimately gain efficiency. Our experienced team has worked with prestigious organisations including the FBI, Sports Direct and Sony and we have ambitious plans to scale quickly over the next few years!

Right now, we're looking for new members of our team to join us on our journey. At Halo you'll play a pivotal role in our success from day one, gaining experience on exciting development projects with direct support from our senior development team. Whilst you can expect to have ownership of your own projects, the development team work collaboratively to share ideas in our work-hard, play-hard environment.

A little about you...

- Keen to have ownership of your own development projects.
- Always looking for opportunities to innovate new areas in the system.
- Interested in fixing bugs and working with our customers to improve our web-apps.
- BSc in Computer Science, Mathematics or similar.
- Will develop new and existing integrations with other leading platforms.
- Excited to help drive innovation, offer new ideas and think up new ways of tackling problems!

What to expect

Our 9 Week Summer Internship Program begins in June. Your professional growth and development will be supported throughout the internship program via project work related to your professional interests, mentorship, engaging speaker series with senior leaders and more. Full-time employment offers may be extended upon successful completion of the program.

Our areas of focus include Big Data Analytics, Deep Learning, Reinforcement Learning, Natural Language Processing, Speech/Voice Analytics, Time Series, Computer Vision, Cryptography, Explainability and Interpretability.

About You

Our team of global experts is always working to keep us ahead of the curve. That's why we're looking for fresh thinking like yours-to design, build, deploy and run tomorrow's innovative technology and analytics. Key Qualifications include:

- Pursuing a Bachelor's or Master's degree program in Science, Technology, Engineering, Mathematics (STEM) with an expected graduation of January 2024 - December 2024
- Knowledge of machine learning / data science theory, techniques and tools
- Experience in mathematics and statistics modelling
- Programming experience with one or more of Python, R, C++, Java, C#
- Strong communication skills and the ability to present findings to a non-technical audience

Join us

At JPMorgan Chase, we're creating positive change for the diverse communities we serve. We do this by championing your innovative ideas through a supportive culture that helps you every step of the way as you build your career. If you're passionate, curious and ready to make an impact, we're looking for you.

Statement on reported NHS cyber attack

A number of NHS organisations have reported to NHS Digital that they have been affected by a ransomware attack, affecting a number of different organisations.

The investigation is at an early stage but we believe the malware variant is Wanna Decryptor.

At this stage we do not have any evidence that patient data has been accessed. We will continue to work with affected organisations to confirm this.

NHS Digital is working closely with the National Cyber Security Centre, the Department of Health and NHS England, and is supporting affected organisations and to recommend appropriate mitigations.

Leap Motion designed a \$100 augmented reality headset with super-powerful hand tracking

By Adi Robertson | @thedextriarchy | Apr 9, 2018, 6:00am EDT

SHARE

Gesture interface company Leap Motion is announcing an ambitious, but still very early, plan for an augmented reality platform based on its hand tracking system. The system is called Project North Star, and it includes a design for a headset that Leap Motion claims costs less than \$100 at large-scale production. The headset would be equipped with a Leap Motion sensor, so users could precisely manipulate objects with their hands — something the company has [previously offered](#) for desktop and VR displays.

Project North Star isn't a new consumer headset, nor will Leap Motion be selling a version to developers at this point. Instead, the company is releasing the necessary hardware specifications and software under an open source license next week. "We hope that these designs will inspire a new generation of experimental AR systems that will shift the conversation from what an AR system should look like, to what an AR experience should feel like," the company writes.

Description

This regular get-together, aimed at anyone involved in - or interested in - the digital creative industry is held on the 1st Tuesday of every month, and is hosted by Studio Republic.

The next meetup will take place on December 4th.

As well as the usual mix of fantastic chat in the company of like-minded people, beer, snacks and *excellent* pizza, sponsored by our friends at [The Stable](#), we will have a talk from Steph Barden, Front-end Developer of [Rareloop](#). She'll be talking about her experience of being a student and juggling work placements at the same time.

Date And Time

Tue 4 December 2018
18:30 - 21:30 GMT
